BUREAU OF WATER  
OFFICE OF THE DIRECTOR

FEB 14 2010

February 1, 2010

Dear Mr. Stacey:

Thank you for your tremendous efforts in developing the new streamflow regulations. Our environment needs this protection and I applaud your efforts. The Class 4 rivers need your protection as well, as there appears to be no minimal standards to keep those rivers alive and healthy. We should be concerned with the health of all rivers. I believe there can be a balance in water usage versus environmental protection and hope that these regulations can find the appropriate point.

Thank you for your time and attention in developing these regulations.

Sincerely,

Tammy Casey
